BULLET FROM GUN ON PLANE HITS GIRL SEATED IN LAUNCH

Flyer Sweeps Surface of Bay Near Newport and Then Quickly Disappears.

SEARCH FOR THE AIRMEN

Victim's Companions Were of Belief That Aviators Saw Them While Shooting.

PROVIDENCE, Aug. 9.-A scaplane day. The shots wounded Grace Buxtwenty-one, daughter of F. J. Buxton of Oakland Beach, one of the the craft.

While the boat party was straining every effort to keep the launch from mile away, rested a moment, rose again and disappeared in the direction of Newport.

When the launch party reached their home wharf in Bullneck Cove Oakland Beach, Miss Buxton was rushed to Frank Toole's home, and Dr. Bernard H. Gilbert of Conimicut was called. He found that the bullet had passed through the calf of the girl's right leg and grazed the flesh of the left.

Federal and naval authorities are endeavoring to establish the identity of the plane. Because of mobile headquarters the airrraft is maintained aboard one of the ships in Newport Harbor and communication with it is possible only by wireless. The identity of the plane or the fliers had not been established up to an early hour to-day.

The motor boat party caught glimpse of the craft as it circled Prudence Island. At intervals they heard the sound of firing, but paid little attention to it, believing that it was firing practice by the ships in Newport Harbor.

Miss Buxton was sitting in the bow of the boat, under a canvas awning. The other members were in the stern The plane came on circling over Hope Island and firing. They could see the pilot and the observer and believed that they were equally visible.

The plane was flying about 300 feet high and it eventually gained such a toward them from the rear, spreading
